-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 28 January 2005 has been entered.

2. The rejection of claim 38 over Strong in view of Jackson is withdrawn in view of the new amended language of the second or top layer being free of overlapping material on the top surface intended for direct body contact. There is no motivation in Strong or Jackson to remove the top-cushioning layer of Strong. A new ground of rejection is given below in response to the currently amended claim.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claim 38 is rejected under 35 U.S.C. 103(a) as being unpatentable over Armstrong (U.S. 2,998,817) in view of Johnson, Jr. (U.S. 4,628,945).

Armstrong teaches a flexible sheet material with top and bottom impermeable layers with the top layer having perforations to allow ventilation of a body in contact with the top surface, and inflation means (col. 3, lines 5-15, col. 3, lines 70 through col. 4, line 20). Johnson, Jr. teaches the use of a permeable compressible layer to provide some cushioning between two outer joined impermeable sheets before inflation of the joined sheets (abstract). The instant invention claims a permeable material next to an impermeable sheet with perforations with means to flow air through the permeable layer and into the perforations of the top perforated layers. It would have been obvious to one of ordinary skill in the art to have placed a compressible material between the outer layers of Armstrong in order to provide some cushioning during initial inflation of the mattress of Armstrong while still allowing

alternate inflation and deflation of the alternate portions of Armstrong because of the teachings of Johnson, Jr.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
